JOLLY HELMET · BOX 3

Customer screen flow: what the TFT shows, step by step

Source: **BOX 3 STEP corrected.txt** (Box Cycle Designer export)
file saved 2026-11-03 00:04 · 36 steps · preset "NEW FLOW"
Pictures are drawn from the screen data in that file (numbers on them are examples).

start / end screen · screen the customer sees · the machine is running · side screen (question or notice) · fault · arrow text = what moves the screen on · ① side screen shown at the bottom

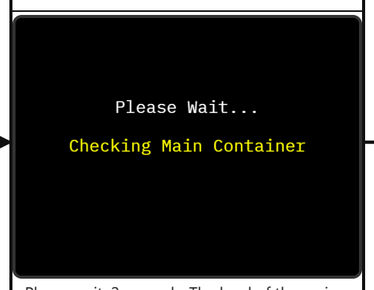

START SCREEN

Resting screen. Any touch starts.
TAPS

tap

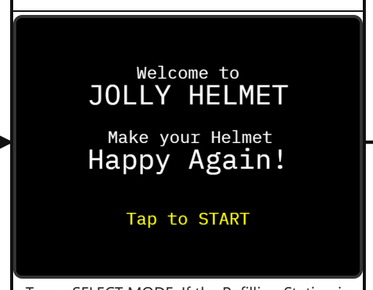

CHECKING MAIN CONTAINER

Please wait, 2 seconds. The level of the main container comes from the Refilling Station.
Machine: everything off · **2 s fixed**
CHECKING C

after 2 s

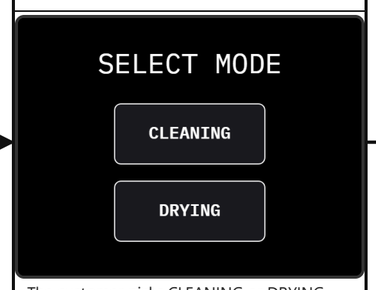

WELCOME

Tap → SELECT MODE. If the Refilling Station is silent (15 s) or the container is EMPTY / LOW → the dry-only screen.
WELCOME

tap, container MID or more

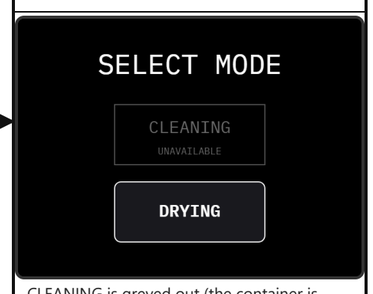

SELECT MODE

The customer picks CLEANING or DRYING.
Buttons: CLEANING / DRYING
SELECT MODE

tap, but the container is EMPTY or LOW, or the Refilling Station is silent

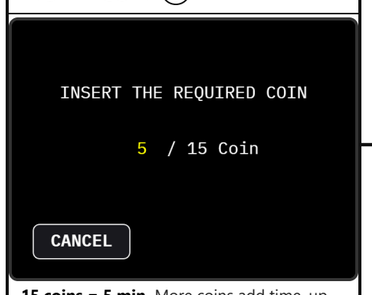

SELECT MODE · DRY ONLY

CLEANING is greyed out (the container is EMPTY or LOW, or the Refilling Station is not heard). Only DRYING can be pressed.
Buttons: DRYING
SELECT DRY ONLY

CLEANING or DRYING button
(DRYING button only, in dry-only)

INSERT COIN ①

15 coins = 5 min. More coins add time, up to 90 coins (30 min). CANCEL → ①
Machine: coin slot ON
CL INSERT COIN / DR INSERT COIN

enough coins

OPEN THE DOOR

The door stays unlocked until it is opened.
Machine: door lock released
CL OPEN A / DR OPEN A

door opened

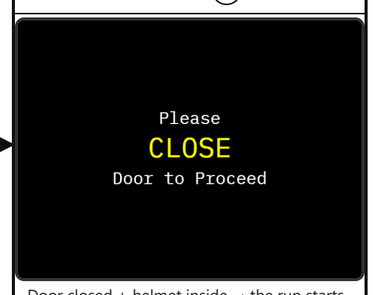

PLACE THE HELMET ③

Waits for the helmet. Door closed with no helmet → notice ③.
CL SENSORS A / DR SENSORS A

helmet inside

CLOSE THE DOOR ③

Door closed + helmet inside → the run starts.
No helmet → notice ③.
CL CLOSE DOOR A / DR CLOSE DOOR A

CLEANING chosen:
door closed + helmet inside

DRYING chosen:
door closed + helmet inside

IF CLEANING WAS CHOSEN

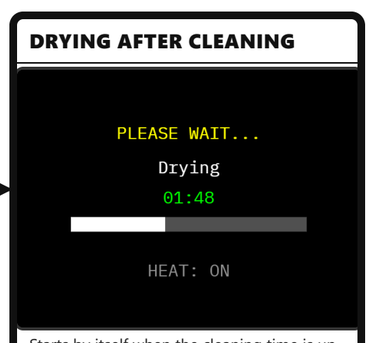

CLEANING (UV + MIST) ②

Extra coins add time.
Machine: coin slot ON · 3 humidifiers (mist) · UV 1 + UV 2 · **time bought with the coins**
CLEANING BAL

time is up

DRYING AFTER CLEANING

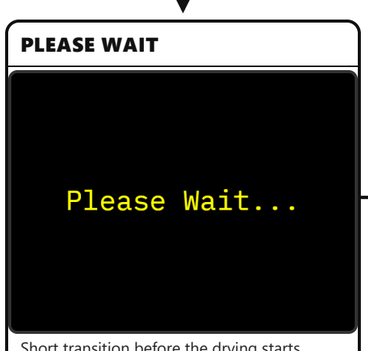

Starts by itself when the cleaning time is up. Also reached by CANCEL → CONFIRM ②.
Machine: UV 1 + UV 2 · heater (OFF for the last 30 s) · **3:00 min fixed**
CL HEATING

time is up

IF DRYING WAS CHOSEN

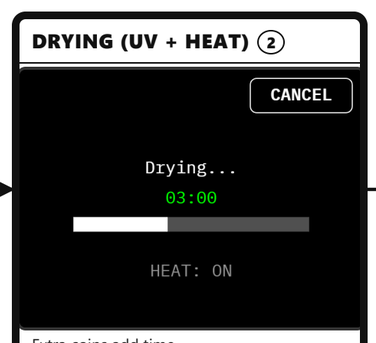

PLEASE WAIT

Short transition before the drying starts.
START HEATING

automatic

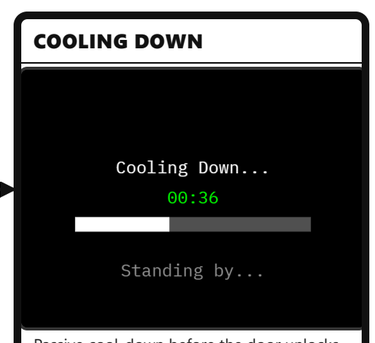

DRYING (UV + HEAT) ②

Extra coins add time.
Machine: coin slot ON · UV 1 + UV 2 · heater · **time bought with the coins**
DR HEATING

time is up

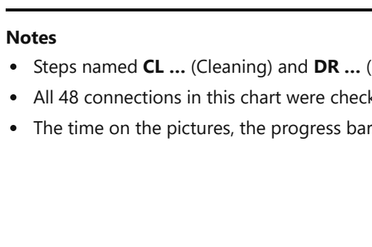

COOLING DOWN

Passive cool-down before the door unlocks.
Machine: everything off · **1:00 min fixed**
DR COOLDOWN

time is up

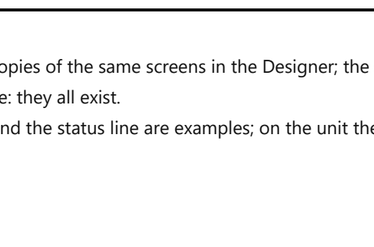

OPEN THE DOOR

The door lock is released.
Machine: door lock released
CL OPEN B / DR OPEN B

door opened

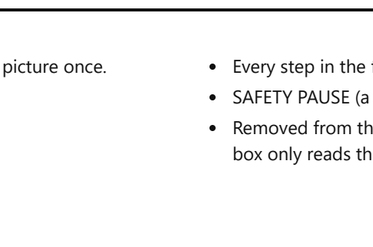

TAKE THE HELMET ④

Waits until the helmet is out. Door closed with the helmet still inside → notice ④.
CL SENSORS B / DR SENSORS B

helmet taken out

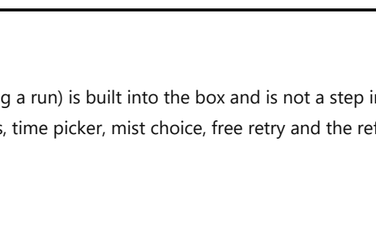

CLOSE THE DOOR ④

Door closed + helmet out → Thank you.
CL CLOSE DOOR B / DR CLOSE DOOR B

door closed, helmet out

THANK YOU

Then back to the start screen.
Machine: everything off · **5 s fixed**
CL FINISH / DR FINISH

after 5 s: back to the start screen

CONTAINER EMPTY OR LOW?

The box offers **DRYING only**.

The **Refilling Station** fills the container by itself: one valve at a time, EMPTY boxes first, then LOW. Nobody has to do anything; the next customer gets CLEANING again as soon as the container reads MID or more.

If the station cannot fill it, the owner sees an alert on the Online web page and the LocalServer.

SIDE SCREENS (numbers ① ② ③ ④ in the chart above)

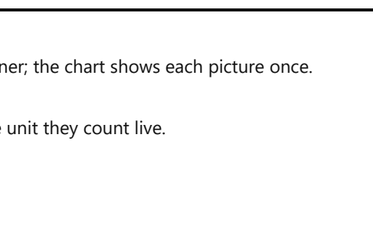

① CANCEL? (COIN STAGE)

Shown by the CANCEL button on INSERT COIN.
YES → back to the start screen
NO → back to the previous screen
CL CANCEL / DR CANCEL

② CANCEL? (DURING THE RUN)

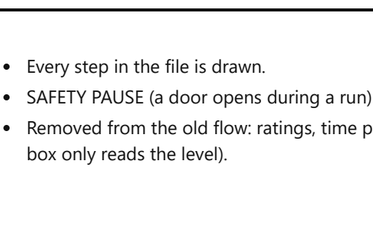

Shown by the CANCEL button while cleaning or drying.
CONFIRM → Drying after cleaning
RESUME → back to the previous screen
CL ABORT / DR ABORT

③ NO HELMET DETECTED

Shown 2 s, then back to OPEN THE DOOR.
after 2 s → Open the door
CL HELMET NOTICE A / DR HELMET NOTICE A

④ HELMET STILL INSIDE

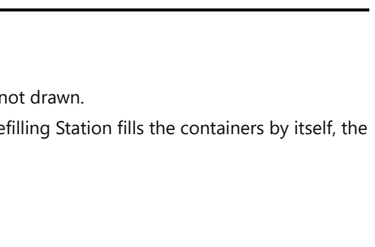

Shown 2 s, then back to OPEN THE DOOR.
after 2 s → Open the door
CL HELMET NOTICE B / DR HELMET NOTICE B

MAINTENANCE

Technician only: switched on from the LocalServer page.
MAINTENANCE

OUT OF ORDER

Shown when the sensor board (helmet, enclosure door) or the relay board stops answering: the box cannot run UV safely and takes no coins.
OUT OF ORDER

Notes

- Steps named **CL …** (Cleaning) and **DR …** (Drying) are two copies of the same screens in the Designer; the chart shows each picture once.
- All 48 connections in this chart were checked against the file: they all exist.
- The time on the pictures, the progress bar, the coin count and the status line are examples; on the unit they count live.
- Every step in the file is drawn.
- SAFETY PAUSE (a door opens during a run) is built into the box and is not a step in this file, so it is not drawn.
- Removed from the old flow: ratings, time picker, mist choice, free retry and the refill screens (the Refilling Station fills the containers by itself, the box only reads the level).
